“Designing Effective Policy: Evidence from a Longitudinal Study of School District Wellness Policies in Florida”

**Monday, October 10, 2016**

12:00 – 1:00 p.m.

Ostrom Workshop, 513 N. Park

Public policy outcomes are fundamentally shaped by the design of public policies and the organizations charged with administering them. However, few studies to date have modeled policy and administrative attributes alongside each other as determinants of policy outcomes. In this paper, we intersect public policy and public management scholarship to address this limitation. Specifically, we examine how the design of Florida public school district wellness policies and school district-level characteristics link to student health outcomes between the years of 2003–2013. Our results show the significance of policy design and district attributes in shaping student wellness over the study period. We conclude our paper with a discussion of next steps for this research.

**Saba Siddiki** is an assistant professor in the School of Public and Environmental Affairs at Indiana University–Purdue University Indianapolis. Her research focuses on policy design, collaborative policy-making, and regulatory implementation and compliance. She has studied these topics in the contexts of aquaculture, organic farming, food system governance, and vehicle regulations. Her research has been published in the *Policy Studies Journal*, *Journal of Public Administration Research and Theory*, *Regulation and Governance*, and *Public Administration*, among other journals ([website](#)).

Presentations are open to the public and are live streamed (see our website for URL and papers). You are welcome to bring your lunch. For questions, contact Allison Sturgeon ([sturgeon@iu.edu](mailto:sturgeon@iu.edu); 812/855–3151).
