Kelley School of Business, IU Bloomington

“Information and the Regulatory Landscape: A Growing Need to Reconsider Existing Legal Frameworks”

Monday, September 18, 2017

12:00 – 1:00 p.m.

Ostrom Workshop, 513 N. Park

Advanced artificial intelligence (AI) systems are already being used to enhance our lives and to transform the way businesses operate. Businesses across a broad spectrum of industries are exploring the potential gains offered by AI systems. In fact, the use of AI systems is already widespread in areas such as transport, finance, defense, social security, education, policing, public safety, and healthcare. The recent explosion of machine-learning technology is arguably a product of two things: “tremendous increases in computational power and enormous volumes of accumulated data.” Unsurprisingly, legal frameworks and industry-based governance regimes have failed to keep up with the newest AI. The existing gaps have led to industry attempting to fill the void, but these attempts are in their infancy and often fail to fully consider the various stakeholders impacted by the ubiquitous gathering and corresponding use of data. This paper and corresponding discussion will briefly explore the existing landscape of regulation with the area and will (hopefully) quickly move into a discussion of the regulatory future of data management and information governance as explored through industry and policy recommendations.

Anjanette (Angie) Raymond is an associate professor in the Department of Business Law and Ethics at the Kelley School of Business and an adjunct associate professor of law at Maurer Law School, IU Bloomington. She is currently a Visiting Fellow in International Commercial Law at the Centre for Commercial Law Studies, Queen Mary, University of London, and lectures on international arbitration at the World Intellectual Property Organization ([website](#)).

Presentations are open to the public and are live streamed (see our website for URL and papers). You are welcome to bring your lunch. For questions, contact Allison Sturgeon (sturgeon@iu.edu; 812/855-3151).
