

IU ETHICS, VALUES & TECH:

Developing Character for a Digital World Series

[@DigEthic](#)

Cloud, Geopolitics, and the Ethics of Statecraft

Talk presented by

**Trey Herr and
Safa Shahwan Edwards**

Atlantic Council's
Cyber Statecraft Initiative,
Scowcroft Center

Cyber Statecraft entails myriad choices about how and to what end governments use technology. Cloud computing has reshaped the technology landscape, concentrating risk and presenting both new challenges and opportunities to the security of data. This discussion frames state decisions in cyber statecraft along the familiar frontier typology - the good, the bad, and the ugly - and explores how the influence of cloud providers on governments, and governments on providers, is shaping a grand debate.
